

IN SOUTH CHINA SEA

Sunday Nov.03.2019

Professor **Eric Cunningham**, Gonzaga University/History Dept
-- China has been since 1949, a horror-show run by unimaginative and thuggish plutocrats who have been falsely propped up by western professors and journalists as brilliant statesmen and political philosophers who possess not only the inscrutable

ancient wisdom of the Chinese sage, but also the healthiest reforming instincts of the western liberal rulers...

-- Xi Jinping, like most Chinese leaders since 1949, a third rate gangster who has been given way too much power by the masters of the universe. These same masters -the elites of a global society, are now poised to collapse the world financial structures, and take unto themselves yet more of the world's financial and real assets- and the almighty China will one of their chief agents of destruction.

-- There is a civil war taking place in the ranks of the global elites, and the area of contest would seem to be whether the "global" or "national" paradigm of human organization should prevail. Trump, as the head of a nation-state is clearly in the camp of the "nationalist" faction, and he is in pitched battle with the globalists from whom he has apparently defected... Trump's stand in favor of free navigation (which would interfere with Chinese -and by extension- deep state control) is much in keeping with a worldview that favors the free sovereign state.

Journalist **William Jasper**, Senior Editor of TheNewAmerican.com

-- As a journalist for the past for the past 45 years, a considerable amount of my time and writing have been focused on China, and its rise to global economic and military dominance. I have focused also on the disastrous policies of the United

States government --under both Democrat and Republican administrations --that have built the Communist regime in Beijing into the immense threat to peace, security, and freedom that it is today.

-- I was in high school and college during the time period of Mao Zedong's Cultural Revolution, when millions of Chinese were murdered by his regime and more than 100 million subjected to the traumas of prison and/or "reeducation" camps. I remember well those American communist revolutionaries, such as Bill Ayers and Bernadine Dohm, who went to China at that time and glorified Mao. This was at the same time that communist China and Russia were supporting the communist regime of Ho Chi Minh that was slaughtering Vietnamese, as well as American soldiers in the Vietnam War. Now Ayers, Dohm, and many of their fellow traitors are professors, and are infecting new generations of students with their deadly ideology.... As a correspondent at the United Nations for more than three decades, I have viewed with great alarm, Communist China's huge advances in taking control of many of the agencies and branches of the United Nations... ■
